Airbus A350 'Main Lounge' concept - Unique Design Studio.

Completions and Refurbishment

You'll be welcomed to our facilities with characteristic Swiss courtesy by industry experts and craftsmen whose aviation know-how, networks and skills ensure a perfect understanding of your completions needs and expectations.

AMAC Workshops

Our workshops are spacious, innovative and are state-of-the-art where technology is a given. They're outfitted with modern cabinetry, upholstery, sheet metal, paint, cabin varnish, battery, NDT/wheel, window shade, electro outfitting, composite and electro/avionic workshops. AMAC is authorized to upholster, inspect, install TSO tags and ship completed seats directly to end users, or install them on the aircraft as part of the completion or refurbishment project.

AMAC Approvals

Design Organisation:

- European Aviation Safety Agency (EASA) - Ref: EASA.21J.414
- UAE General Civil Aviation Authority (GCAA) - Ref: DOA/123

Production Organisation:

- Federal Office of Civil Aviation (FOCA) - Ref: CH.21.G.0015

Completion OEM Approvals:

- Airbus Completion Center Approval
- Boeing Completion Center Approval

Seats Approvals:

- Approvals from various seat structure manufacturers to design, manufacture and certify VIP seats and divans

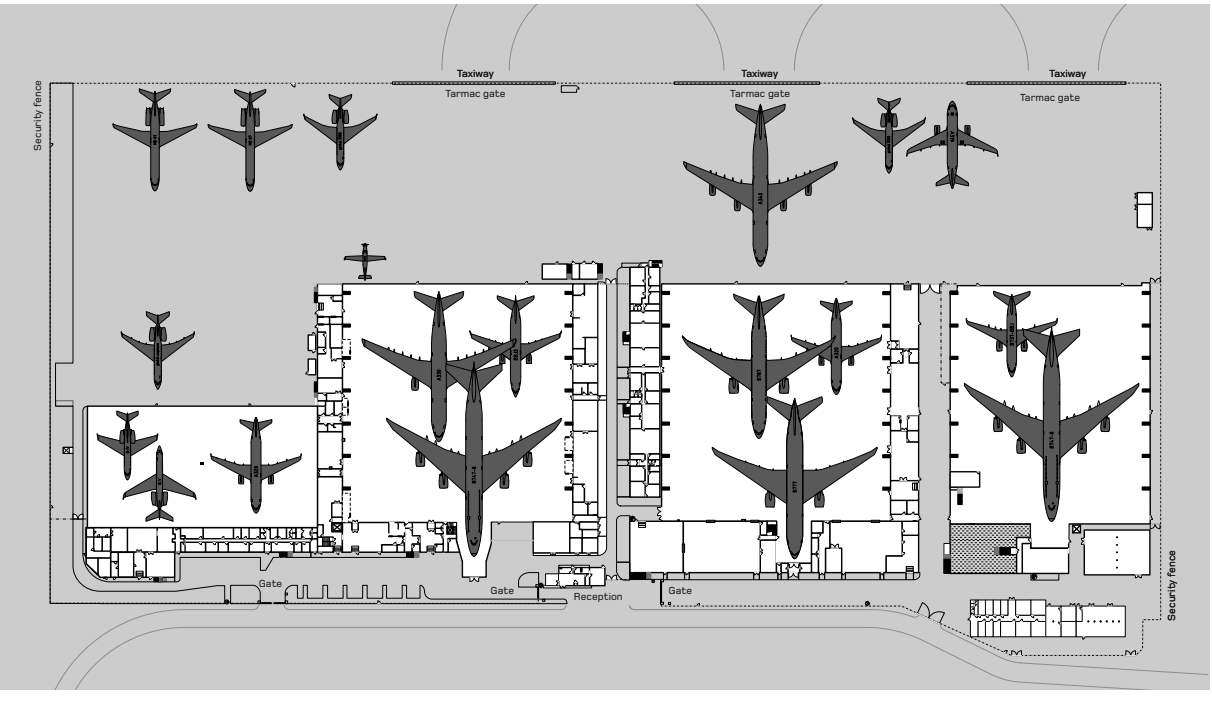
Hangars and Capacity

AMAC Aerospace, renowned for excellence in business aviation, has four state-of-the-art hangars in the heart of Europe at Switzerland's EuroAirport Basel-Mulhouse. These can accommodate multiple narrow and wide-body aircraft; Boeing B747s, B777s, B787s, Airbus A340s, A330s and even has the space for an A380 as well as select small business jets, as our hangar space totals 28,280 m^2. AMAC's generous workshop and office area covers 6,251 m^2, and our total apron area is 44,610 m^2.

The tactical interlinking of the hangars and workshops ensures superior time management and manpower allocation for in-house projects. Our narrow-body/ mid-size jet hangar is 4,200 m^2. The two Airbus A320/ Boeing Business Jet BBJ/ Gulfstream G550-sized bays are equipped with the latest technological innovations to meet the highest standards of safety.

Our three wide body hangars can accommodate a Boeing B747-8, B777 or an Airbus A330-200 and an A320 or a Boeing Business Jet. They were designed to extend to comfortably service an Airbus A380 as well. All three wide-body hangars account for 24,080 m^2 of hangar floor-space.



Our Hangars at EuroAirport Basel–Mulhouse, Switzerland.

The Aesthetics of Aviation

AMAC Aerospace exists to please extraordinary people, those people lucky enough to have wings. Our clients are among the most discerning in the world: international business executives, government officials, royal families and high-net-worth individuals.

They've earned our esteem; we strive to earn theirs. No design request is too big, too small, too "eccentric" or too ambitious.

AMAC's aesthetic intelligence tends to exceed client expectations and we pride ourselves on delivering on time and within budget. With your imagination and our expertise – the ideal aircraft interior is completed.

Excellence in Aircraft Completions and Refurbishment

AMAC Aerospace was founded on aviation expertise born of extensive industry engagement. Renowned for Swiss excellence in business aviation, we are a privately held company offering discerning, VIP and corporate business aviation services.

Harmonizing individual aesthetics, utmost safety and engineering precision for superior functionality makes the craft of completions and refurbishment an exacting one. It's that trio of factors that determines both the integrity of your aircraft and the realization of your dream interior.

A highly experienced and motivated staff is crucial to delivering on time and within budget. Our workshops are manned with the best craftsmen in the industry and outfitted with state-of-the-art cabinetry, upholstery, sheet metal, composite and electro/avionic workshops. A vibrant shop-floor, for simultaneous and multiple completion or refurbishment projects, awaits our exclusive clientele.
