

## NEW PROJECTS FOR AMAC AEROSPACE

EVA INTERNATIONAL MEDIA LTD  
PUBLISHERS & EVENTS SPECIALISTS

After the successful return to service of the B747-8i, AMAC Aerospace has attracted major maintenance and refurbishment projects.

### C-Check on an A330-200 VIP aircraft successfully completed

AMAC Aerospace Switzerland successfully completed a C-Check on an A330-200 VIP aircraft. During the C-Check various cabin interior details have been reworked in accordance to the customer's requirements for refurbishment. The C-Check has been performed to the customer's full satisfaction and the aircraft has been delivered one week before the contractual delivery date.

### BBJ 737-700 refurbishment contract awarded to the AMAC Aerospace facility in Basel

AMAC Aerospace Switzerland is proud to announce that from an undisclosed client a BBJ 737-700 refurbishment contract has been awarded to the facility in Basel. All cabin seats and divans will be stripped and re-upholstered in accordance with the new approved design package. A new hand-made customized cabin carpet will be installed in the cabin of the BBJ 737-700. All cabin work has been certified by AMAC's in-house design organization department. AMAC Aerospace's technical skills, hangars and their human capital continues to grow.

### BBJ 3 737-900ER successfully returned to service

AMAC Aerospace Switzerland has successfully returned to service a BBJ 3 737-900ER, which was handed to AMAC for a cabin interior re-configuration. The re-configuration included a built-up upholstery of new VIP seats, the installation of electrical high-low tables and a new VIP handmade carpet. The existing divans have been modified to add more functionality and better comfort. The modification has been accomplished on the EASA STC (Supplemental Type Certificate). AMAC's customer is fully satisfied with the quality of workmanship and the on-time delivery of his BBJ 3 737-900ER.

### New heavy base maintenance contract for a Boeing 777-200 by AMAC Aerospace Switzerland signed

AMAC Aerospace Switzerland signed a new heavy base maintenance contract for a Boeing 777-200. The heavy maintenance package will include multiple cabin modifications. This contract is a further milestone for AMAC Aerospace Switzerland AG to provide highest quality and maintenance services for widebody aircrafts.
