

In Brief

AMAC Completes First A320

AMAC Aerospace has recently delivered its first completed VVIP Airbus 320 to a head of the state in the Middle East. The aircraft has a full VIP configuration including 48 seats, a bedroom, shower and state-of-the-art cabin entertainment system.

The system includes on-demand audio and video, wireless LAN and SATCOM. The cabin design, by Studio Emotion, was implemented in nine months.

The client also signed a flight support agreement with AMAC's dedicated operation team. AMAC will shortly begin its next completion project, the fit-out of an Airbus 319.
