Amac Shows Its Lighter Side

by James Wynbrandt
May 26, 2016, 4:10 AM

The team from Amac Aerospace Switzerland (Booth H115) displays a composite low cabinet, highlighting its new Light Weight Cabinet Build process, which offers a 30 percent weight savings in comparison to standard cabinet builds. The composite build process was developed by Amac subsidiary JCB Aerospace (Booth P098), which Amac recently acquired. Proudly showing off the new offering are (L-R) Jean Claude Beaudet, JCB Aero CEO; Bernd Schramm, Amac Group CEO; Corinne Cellier-Beaudouin, public relations, JCB Aero; Mauro Grossi, Amac Group CFO; and Kadri Muhiddin, Amac Group executive chairman and CEO.
