

AMAC Aerospace: New maintenance projects and an Award for cutting-edge engineering skills

Three Airbus A319 maintenance projects have been awarded to AMAC Aerospace, Switzerland

AMAC Aerospace is pleased to announce that several maintenance projects have been awarded to the headquarters in Switzerland: Three Airbus A319 undergo maintenance and inspection work, while a Boeing B767 will have an engine change and a 6-month check will be performed on a Bombardier Challenger 350. In Vienna, AMAC Aerospace received for the collaboration the "Channel Partner Award" by Honeywell.

A privately-owned Airbus A319 will enter AMAC Aerospace's facility in Basel, Switzerland by the end of February. AMAC has been awarded to provide a 6-, 12- and 24-month inspection with AD's and SB's on the Airbus A319. Simultaneously an out of phase will be carried out by AMAC's maintenance team. Next to the maintenance work AMAC will perform a partial cabin refurbishment.

On an Airbus A319 AMAC Aerospace Basel, Switzerland had to carry out an AOG onsite maintenance support. AMAC acted immediately and a team was dispatched to the AOG support outside of Basel in less than two hours. The Airbus A319 could go back to its normal service on the same day.

A Head of State Airbus A319 has been re-delivered after a 12-month inspection with AD's and SB's which were completed by AMAC teams in Basel, Switzerland. Besides the maintenance inspection, a minor cabin refurbishment was made and the aircraft was completed on time.

Ambitious schedule for an engine change on the Boeing B767

A privately-owned Boeing B767 will enter AMAC's facilities in Basel, Switzerland by the end of the month. AMAC Aerospace will carry out an engine change on the Boeing B767 within a reduced ground time. For this project a special shift plan has to be created to meet the customers schedule expectation to re-deliver the aircraft on time.

AMAC Aerospace has been awarded by a new customer to perform a 6 month check on a privately-owned Bombardier Challenger 350. The aircraft will enter AMAC's facilities in Basel, Switzerland on short notice. Next to the 6-month check AMAC will do service bulletins on the Challenger 350.

"In order to provide our customers an excellent service we do our best to implement their wishes if they need the aircraft in a certain time. Our talented and qualified mechanics make this possible." said Alexis Ott, Director Maintenance Sales & Key Account Management.

Channel Partner Awards

An award has been given to AMAC Aerospace on the 29th of January 2019. Mrs. Tracey Hawthorne-Kurz received the 'Channel Partner Award' during the 'Honeywell Channel Partner and Operators Conference' in Vienna, Austria. AMAC Aerospace is a key partner from

Honeywell for installing the Jetwave flagship product from Honeywell on almost all VVIP aircraft to provide an incomparable onboard connectivity.

"AMAC has been a key partner for Honeywell since we launched our Jetwave flagship product. They have put their cutting-edge engineering skills at the service of our mutual customers to install Jetwave on almost every VVIP aircraft enabling an unparalleled connectivity experience on board." said Pierre Wilhelm, Account Manager EMEIA B&GA Sales Ops Honeywell.

Smiling faces (from the left): Mark McGraw, Pierre Wilhelm and Tracey Hawthorne-Kurz after the 'Channel Partner Awards' has been presented to AMAC Aerospace at the Honeywell Channel Partner and Operators Conference in Vienna, Austria.

"AMAC Aerospace are delighted with this award as we have progressed beyond our expectations in developing such connectivity solutions with Honeywell. The partnership and long-standing collaboration that resides between both companies is a testament to the success we can both share equally. AMAC strives to be at the forefront of modifiable projects and as such we have been extremely successful in delivering unparalleled solutions to new and existing clients. We help serve the future we share together between AMAC Aerospace and Honeywell." emphasized Bernd Schramm, Group COO AMAC Aerospace.
